QUALIFICATIONS

Richfield Graduate Institute of Technology

2017-2019

N-Dip Information Technology

PROJECTS

Banking System

Collaborated on building a full-stack banking system with a responsive React frontend using React-Bootstrap, and a Spring Boot backend in Java. Contributed to key features including account management and transaction tracking. Deployed the application using Render for scalable cloud hosting and ensured seamless functionality across devices.

Movie Database

Contributed to the development of a movie database web application as part of a team. Built a responsive user interface and integrated a third-party movie API to implement key features such as search functionality and dynamic movie detail pages. Gained hands-on experience in API integration, state management, and modern front-end development practices.
